Conservation and sustainable use of marine biological diversity beyond areas of national jurisdiction – BBNJ | 15 – 26 August 2022

The high seas—61% of the ocean that lies in areas beyond national jurisdiction—are the quintessential global commons. Marine biodiversity in areas beyond national jurisdiction (BBNJ) has attracted international attention as scientists reveal the richness and vulnerability of such biodiversity, particularly around seamounts, hydrothermal vents, sponges, and cold-water corals. Concerns have grown about the increasing anthropogenic pressures posed by existing and emerging activities, such as fishing, mining, marine pollution, and bioprospecting.

The high seas are governed by an incomplete patchwork of international organizations and treaties. Even the United Nations Convention on the Law of the Sea ([UNCLOS](#)) offers minimal guidance on environmental conservation. Following more than a decade of discussions convened under the United Nations General Assembly, the Assembly, in its resolution 72/249 in 2017, convened an intergovernmental conference to elaborate a new treaty under UNCLOS on the conservation and sustainable use of BBNJ.

[Summary report, 15–26 August 2022](#)

Despite more progress at this two-week session than over the last decade, delegates were unable to reach consensus on a new high seas treaty addressing marine biodiversity in areas beyond national jurisdiction and, instead, suspended the session, to be resumed in early 2023.

Tenth Review Conference of the Parties to the Treaty on the Non-Proliferation of Nuclear Weapons | 1 - 26 August 2022

The Treaty on the Non-Proliferation of Nuclear Weapons ([NPT](#)) is a landmark international treaty whose objective is to prevent the spread of nuclear weapons and weapons technology, to promote co-operation in the peaceful uses of nuclear energy and to further the goal of achieving nuclear disarmament and general and complete disarmament. The NPT represents the only binding commitment in a multilateral treaty to the goal of disarmament by the nuclear-weapon States.

Intergovernmental Forum on Mining, Minerals, Metals and Sustainable Development (IGF)

The Intergovernmental Forum on Mining, Minerals, Metals and Sustainable Development (IGF) is a voluntary initiative supporting more than 75 nations committed to leveraging mining for sustainable development to ensure negative impacts are limited and financial benefits are shared. Members have access to a number of resources, including IGF's Guidance for Governments, Mining Policy Framework and capacity-building and training opportunities.

Investing in the Women Working in ASM is the Only Way Forward

Women make up an estimated 30% to 50% of the global workforce in artisanal and small-scale mining (ASM). That number rises to 70% or higher in places like Guinea or Uganda. Supporting women must thus be central to any effort to transform ASM for the broader betterment of workers, communities, and the environment.

World Health Organization (WHO) | New global alliance launched to end AIDS in children by 2030

Globally, only half (52%) of children living with HIV are on life-saving treatment, far behind adults where three quarters (76%) are receiving antiretrovirals, according to the data that has just been released in the UNAIDS Global AIDS Update 2022. Concerned by the stalling of progress for children, and the widening gap between children and adults, UNAIDS, UNICEF, WHO and partners have brought together a global alliance to ensure that no child living with HIV is denied treatment by the end of the decade and to prevent new infant HIV infections.

Mckinsey | India as a pharma innovation hub: An interview with Dr. Reddy's G. V. Prasad

The cochairman and managing director of the pharma multinational believes India's competence in new biology, clinical development, and chemistry will increase its global competitiveness.

OECD | Aid for Trade at a Glance 2022 | Empowering Connected, Sustainable Trade

This report analyses the evolution of Aid for Trade flows in a context marked by crises of unprecedented magnitude, with significant impacts on trade and investment. Under the theme "Empowering Connected, Sustainable Trade", it shows that Aid for Trade was an important tool in the fight against the COVID-19 pandemic, and can help address emerging challenges, such as the environmental and digital transitions while ensuring that no one is left behind. Recent data indicate that a shift is under way to put sustainability, including green transition and women's empowerment, at the heart of Aid for Trade, and point to its potential to support an inclusive and sustainable recovery.

African News Agency (ANA)

An Africa-G7 energy food and security grand bargain

Europe, the US, and Africa are all reeling from the prolonged Russia/Ukraine crisis. They need to forge a new grand bargain that holds out the promise of shared energy security, food security, job creation and long-term green growth and prosperity, argues Vera Songwe.

This grand bargain offers a three-pronged deal to the G7.

The EU gets short to medium-term access to energy, stability of supply, and acceleration of the transition as well as new and stronger trade and geopolitical partnerships. Africa gets a surge in investment into food and energy systems and investment for its youth who number seven times as many as European youth and for whom migration seems to be the only attraction.

First on energy, more than 5,000 bcm of natural gas resources have been discovered in Africa. This could cover Europe's immediate needs and also fast-track Africa's energy access and industrialization aspirations.

African Trade Report 2022: "Africa has a bright future"

African trade will have been resilient during the Covid 19 pandemic. This is the conclusion of Afreximbank's Intra-African Trade 2022 report. And it could see a great and strong growth, if we capitalize on the CCI and the [AfCFTA](#), recommends the report.

Commodity Markets: Evolution, Challenges, and Policies

Commodity markets are integral to the global economy. Understanding what drives developments of these markets is critical to the design of policy frameworks that facilitate the economic objectives of sustainable growth, inflation stability, poverty reduction, food security, and the mitigation of climate change. This study is the first comprehensive analysis examining market and policy developments for all commodity groups, including energy, metals, and agriculture, over the past century. It finds that, while the quantity of commodities consumed has risen enormously, driven by population and income growth, the relative importance of commodities has shifted over time, as technological innovation created new uses for some materials and facilitated substitution among commodities.

Understanding Poverty

We face big challenges to help the world's poorest people and ensure that everyone sees benefits from economic growth. Data and research help us understand these challenges and set priorities, share knowledge of what works, and measure progress.

IEA | Solar PV Global Supply Chains

Executive summary > Global solar PV manufacturing capacity has increasingly moved from Europe, Japan and the United States to China over the last decade. China has invested over USD 50 billion in new PV supply capacity – ten times more than Europe – and created more than 300 000 manufacturing jobs across the solar PV value chain since 2011. Today, China's share in all the manufacturing stages of solar panels (such as polysilicon, ingots, wafers, cells and modules) exceeds 80%. This is more than double China's share of global PV demand. In addition, the country is home to the world's 10 top suppliers of solar PV manufacturing equipment. China has been instrumental in bringing down costs worldwide for solar PV, with multiple benefits for clean energy transitions. At the same time, the level of geographical concentration in global supply chains also creates potential challenges that governments need to address.

Carnegie Europe

The [Carnegie Europe Program](#) in Washington provides insight and analysis on political and security developments within Europe, transatlantic relations, and Europe's global role. Working in coordination with Carnegie Europe in Brussels, the program brings together U.S. and European policymakers and experts on the strategic issues facing Europe

Europe Heads Into a Rocky Autumn

Amid soaring energy prices, Russia's continued war in Ukraine, and tensions over Taiwan, the EU will have no respite. The bloc mustn't let internal crises distract from strategically dealing with external challenges.

Making the EU's New Development Aid Work for Democracy

It is crunch time for the EU's external action to support democracy and human rights. Democracy is one of the stated priorities of the EU's new funding instrument, [Global Europe](#), also known as the [Neighbourhood, Development, and International Cooperation Instrument](#). For the first time, this initiative brings together a wide array of disparate foreign policy and development tools to allow for a [more flexible use of the available funds](#), which total €79.5 billion (\$80.6 billion). As the EU is now planning where this money will go, the union needs to show it is committed to integrating democracy into its development aid.

Doing development democratically is not only a matter of principle: it also yields better developmental results. Research conducted by Varieties of Democracy ([V-Dem](#)) shows that democratic institutions at both the national and the local level can act [as drivers of economic development](#) and that there is an [electoral connection](#) between economic development and democracy. To reflect this, as it moves forward with its new cycle of development funding, the EU will need to devise more open policy processes and better links between democracy and the union's other external priorities.

Chatam House | Russia's longstanding problem with Ukraine's borders

Over time it has become clear Russia is unwilling to settle its borders with Ukraine and acknowledge its territorial integrity as an independent state.

As Russia's second invasion of Ukraine drags on, many are keen to see the end of fighting, with some international elites and [political leaders](#) arguing for a truce with Russia.

While their motives and goals [may differ](#), they all hope that with the right concessions Russia can be brought to the negotiating table to agree on a ceasefire, Ukraine's borders, and its place in Europe's security.

But such thinking is sharply at odds with Putin's professed goal of fulfilling Russia's historical mission to 'conquest and fortify', denying Ukraine's right to exist as a sovereign country.

Overview of sustainable finance

Sustainable finance has a key role to play in delivering on the policy objectives under the [European green deal](#) as well as the EU's international commitments on climate and sustainability objectives. It does this by channelling private investment into the transition to a climate-neutral, climate-resilient, resource-efficient and fair economy, as a complement to public money. Sustainable finance will help ensure that investments support a resilient economy and a sustainable recovery from the impacts of the COVID-19 pandemic.

European Statistics (Eurostat)

Digital economy and society—Overview

Mobile internet access, social media use, e-commerce, internet security, cloud services, digital skills and employment of ICT specialists give you just a small taste of the information and statistics you can find here. The statistics on 'Information and Communication Technologies' (ICT) in this section are available separately for households/people and businesses/enterprises

Circular Economy — Overview

A circular economy aims to maintain the value of products, materials and resources for as long as possible by returning them into the product cycle at the end of their use, while minimising the generation of waste. The fewer products we discard, the less materials we extract, the better for our environment.

Climate Change — Overview

Climate change refers to a **change in climate patterns** due to human activities, going beyond the natural variability in the climate. This is caused by **greenhouse gases** emitted into our atmosphere. Among the **drivers** of these emissions are the burning of fossil fuels, industrial processes, livestock farming, and waste treatment.

Energy — Overview

Lighting, heating, transport, industry: energy is vital to run our essential day-to-day services and businesses. We take it for granted that we can switch on our computers and start our cars, yet these simple actions are the final stages of a complex process. For more information, watch our short video explaining how electricity is produced.

Environment — Overview

Eurostat provides a range of statistics and accounts about the state of the environment and the drivers, pressures and impacts of our societies on the environment.

Sustainable development in the European Union — Monitoring report on progress towards the SDGs in an EU context — 2022 edition

Sustainable development is firmly anchored in the European Treaties and has been at the heart of European policy for a long time. The 2030 Agenda for Sustainable Development and its 17 Sustainable Development Goals (SDGs), adopted by the UN General Assembly in September 2015, have given a new impetus to global efforts for achieving sustainable development.

ESTATÍSTICAS (INE)

[Contas Nacionais Trimestrais \(divulgado a 31 de Agosto de 2022\)](#)

Produto Interno Bruto em volume aumentou 7,1% em termos homólogos e registou uma taxa nula em cadeia - 2.º Trimestre de 2022

Resumo > O Produto Interno Bruto (PIB), em termos reais, registou uma variação homóloga de 7,1% no 2º trimestre de 2022 (11,8% no trimestre anterior). Note-se que a evolução em termos homólogos reflete em parte um efeito de base, dado que no 1º trimestre de 2021 estiveram em vigor várias medidas de combate à pandemia que condicionaram a atividade económica. O contributo da procura interna para a variação do PIB diminuiu no 2º trimestre, passando de 10,0 pontos percentuais (p.p.) para 3,7 p.p., verificando-se um crescimento menos acentuado do consumo privado e do investimento. O contributo positivo da procura externa líquida para a variação homóloga do PIB aumentou para 3,5 p.p. (1,7 p.p. no trimestre anterior), em resultado da aceleração mais acentuada das Exportações de Bens e Serviços que a das Importações de Bens e Serviços. No 2º trimestre, os preços implícitos nos fluxos de comércio internacional aumentaram significativamente, tendo-se registado uma maior aceleração nas exportações devido às componentes de serviços, determinando uma perda menos intensa dos termos de troca que no trimestre anterior. O efeito da evolução dos termos de troca conjugado com o comportamento positivo em volume resultaram numa melhoria do Saldo Externo de Bens e Serviços em termos nominais, situando-se em -2,2% do PIB (-3,6% do PIB no 1º trimestre).

Comparando com o 1º trimestre de 2022, o PIB registou uma taxa nula em volume, após um crescimento em cadeia de 2,5% no trimestre anterior, verificando-se um contributo da procura interna de -1,1 p.p. (+2,1 p.p. no 1º trimestre), enquanto o contributo positivo da procura externa líquida aumentou, passando de 0,4 p.p. para 1,1 p.p., refletindo o crescimento em cadeia mais acentuado das Exportações de Bens e Serviços que o das Importações de Bens e Serviços.

No 2º trimestre, o emprego (medido em número de indivíduos e ajustado de sazonalidade) para o conjunto dos ramos de atividade da economia aumentou 1,8% em termos homólogos (4,4% no trimestre anterior), enquanto o emprego remunerado registou uma variação de 2,8% (4,6% no trimestre anterior).

[Península Ibérica em Números - 2021 | Ano de Edição 2022.](#)

Fruto de uma colaboração de quase 20 anos entre o Instituto Nacional de Estatística de Portugal e o Instituto Nacional de Estadística de España, apresenta-se uma nova edição de *Península Ibérica em números / La Península Ibérica en cifras / Iberian Peninsula in numbers*.

Divisão de Estratégia, Planeamento e Estatística (DEPE) | Secretaria-Geral

[Fluxos físicos da energia](#) (divulgado a 19 de Novembro de 2021).

Em 2019, a utilização interna líquida de energia diminuiu 0,7%, enquanto o Produto Interno Bruto (PIB) cresceu 2,7%, em termos reais. Consequentemente, a intensidade energética da economia (relação entre a utilização interna de energia e o PIB) diminuiu 3,3% (em 2018 tinha diminuído 6,1%), registando o valor mais baixo da década. O consumo de produtos energéticos pelas famílias aumentou 1,7%, abaixo do crescimento de 3,4% do consumo privado, concorrendo para uma redução de 1,6% da intensidade energética das famílias (relação entre o consumo de produtos energéticos pelas famílias e o consumo privado).

[Conta das Emissões Atmosféricas](#) (divulgado a 13 de Outubro de 2021).

Em 2019, o Potencial de Aquecimento Global e o de Acidificação diminuíram 4,7 e 1,8%, respetivamente. O Potencial de Formação de Ozono Troposférico aumentou 0,2%. À semelhança do ano anterior, observou-se um decréscimo do Potencial de Aquecimento Global e um crescimento da atividade económica (em 2019 o Valor Acrescentado Bruto cresceu, em termos reais, 2,6%). Esta dissociação refletiu simultaneamente as reduções da intensidade energética e da relação entre emissões e a procura de energia.

[Paridades de Poder de Compra](#) (divulgado a 15 de Dezembro de 2021).

O Produto Interno Bruto per capita, expresso em Paridades de Poder de Compra, situou-se em 76,4% da média da União Europeia em 2020, valor inferior em 2,2 pontos percentuais ao observado em 2019 (78,6%) – 2020

[Estatísticas do Ambiente](#)

A publicação Estatísticas do Ambiente, na sua edição de 2021, segue a linha editorial e a estrutura do ano anterior e apresenta uma análise detalhada do setor do ambiente privilegiando-se a divulgação da informação através de quadros de indicadores síntese, figuras e mapas.

[Objetivos de Desenvolvimento Sustentável](#)

A resolução A/RES/70/1 “[Transformar o nosso mundo: Agenda 2030 de Desenvolvimento Sustentável](#)”(disponibilizada em inglês) foi aprovada na Cimeira das Nações Unidas (NU) sobre Desenvolvimento Sustentável realizada em Nova Iorque, em 26-27 de setembro de 2015. Trata-se de um plano de ação para as pessoas, para o planeta e para a prosperidade e estabelece um conjunto de 17 objetivos – os Objetivos de Desenvolvimento Sustentável (ODS) e de 169 metas a ser alcançados, por todos os países, até 2030. Para monitorizar o progresso dos ODS, a 47ª sessão da Comissão de Estatística das NU (UNSC) acordou, em 2016, um conjunto de 241 indicadores, aos quais a 48ª UNSC fez alguns ajustamentos, em março de 2017. Neste dossier temático (ainda em desenvolvimento) é divulgada a informação já disponível para alguns desses indicadores, podendo alguns ser provisórios e *proxies*.
