Presidência Portuguesa do Conselho da União Europeia

Declaração conjunta de Christa Schweng, Presidente do Comité Económico e Social Europeu, e António Costa, Primeiro-Ministro de Portugal

Na sua reunião de 27 de janeiro de 2021, a Presidente do Comité Económico e Social Europeu (CESE), Christa Schweng, e o Primeiro-Ministro de Portugal, António Costa, declararam que, numa altura em que tudo se tornou urgente – vacinação, retoma económica, transições climática e digital e relançamento do Pilar Europeu dos Direitos Sociais –, é especialmente importante colocar a tónica na qualidade da execução.

Para pôr em marcha a recuperação económica e social europeia, o Primeiro-Ministro e a Presidente do CESE concordaram que é necessário fazer chegar rapidamente o financiamento do Fundo de Recuperação e Resiliência aos nossos cidadãos e empresas e concretizar o Pilar Europeu dos Direitos Sociais, como base de confiança nas transições climática e digital, sem deixar ninguém para trás.

World Economic Forum | The Global Risks Report 2021

In partnership with Marsh McLennan, SK Group and Zurich Insurance Group

The 16th edition of the World Economic Forum’s *Global Risks Report* analyses the risks from societal fractures—manifested through persistent and emerging risks to human health, rising unemployment, widening digital divides, youth disillusionment, and geopolitical fragmentation. Businesses risk a disorderly shakeout which can exclude large cohorts of workers and companies from the markets of the future. Environmental degradation—still an existential threat to humanity—risks intersecting with societal fractures to bring about severe consequences. Yet, with the world more attuned to risk, lessons can be drawn to strengthen response and resilience. In 2020, the risk of a pandemic became reality. As governments, businesses, and societies grapple with COVID-19, societal cohesion is more important than ever.

Second report on progress prepared by the Independent Panel for Pandemic Preparedness and Response for the WHO Executive Board

In Key messages | The world was not prepared, and must do better The Independent Panel for Pandemic Preparedness and Response is painfully aware that the world was not prepared for the coronavirus disease (COVID-19) pandemic. When the scale of the pandemic and its impact became evident, as well as the failures in the chain of preparedness and response, communities and leaders around the world rallied in response, rethinking systems, providing mutual support and solidarity, and sparing no effort in devising the care, treatments, and prevention needed to confront severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2).

[ETTG | Mind the Gap? Sketching the relevance of the 2030 Agenda for the Green Deal and other key EU policies in the context of the COVID-19 crisis](#)

The consequences of COVID-19 will shape European policies and politics for years to come. Already before the pandemic, the European Union (EU) was facing difficulties in implementing the 2030 Agenda for Sustainable Development and making progress on the 17 Sustainable Development Goals (SDGs). Europe is lacking behind particularly on the SDGs related to agriculture, climate change and biodiversity and in strengthening convergence of living standards across EU member states. The pandemic has made these SDGs even more difficult to achieve by 2030, and could derail progress on other SDGs as well. Moreover, recovery measures to address the pandemic's short- and medium-term socio-economic consequences will determine whether the EU moves towards a sustainable development model by 2030 or locks in unsustainable pathways instead.

[OECD | Better use of energy taxes could strengthen developing country finances while cutting pollution](#)

January 25, 2021 - Developing countries could raise much-needed public revenues, while cutting emissions and air pollution, by making better use of energy taxes and reducing energy subsidies, according to a new OECD report.

[Taxing Energy Use for Sustainable Development: Opportunities for energy tax and subsidy reforms in selected developing and emerging economies](#) examines energy taxation in 15 developing and emerging economies in Africa, Asia and Latin America and the Caribbean. The report finds that well-designed energy and carbon taxes can strengthen efforts to improve domestic revenue mobilisation. While the revenue potential varies across countries, the report finds that, on average, the countries could generate revenue equivalent to around 1% of GDP if they set carbon rates on fossil fuels equivalent to EUR 30 per tonne of CO₂

[EllenMacarthurFoundation | New policy goals offer an opportunity for circular economy transition at scale](#)

Published today (January 28, 2021), our latest paper [Universal circular economy policy goals: enabling the transition to scale](#), aims to create a common direction of travel in policy development for a faster transition to a circular economy.

The new policy goals will enable governments and businesses to benefit from the circular economy, which offers solutions to key global challenges such as climate change, biodiversity loss, and pollution.

[European Parliamentary Research Service Blog | Covid-19 Vaccination Campaigns: The Public Dimension](#)

Posted By Members' Research Service · January 29, 2021

The arrival of the Covid-19 vaccines marks a turning point in the fight against the coronavirus pandemic. For European Commission President Ursula von der Leyen, vaccination is about self-protection and solidarity. For many people, it is also about trust. Some are hesitant to get vaccinated, while others are against vaccination on principle. According to estimates, coverage of at least 60 % to 75 % is needed to establish population immunity through vaccination

A gateway to existing STI initiatives, mechanisms and programmes within and beyond the United Nations

UN Member States agreed that the online platform will “establish a comprehensive mapping of, and serve as a gateway for, information on existing science, technology and innovation initiatives, mechanisms and programmes, within and beyond the United Nations,” “facilitate access to information, knowledge and experience, as well as best practices and lessons learned, on science, technology and innovation facilitation initiatives and policies” and “facilitate the dissemination of relevant open access scientific publications generated worldwide”.

UN_DESA | World Economic Situation and Prospects 2021

A once-in-a-century crisis—a Great Disruption unleashed by the COVID-19 pandemic—hit the world economy in 2020. The pandemic reached every corner of the world, infecting more than 90 million and, so far, has killed close to 2 million people worldwide. Governments around the world responded rapidly—and boldly—to stem the health and economic contagion of the crisis. Fiscal and monetary stimulus packages were quickly rolled out to save the economy. The crisis responses, however, entailed difficult choices between saving lives and saving livelihoods, between speed of delivery and efficiency, and between short-term costs and long-term impacts.

Econpol | The Global Economic Impact of Politicians: Evidence from an International Survey RCT

In Abstract: We use the US presidential election on 3 November 2020 to examine how the US president influences economic expectations of international experts. We design a large-scale RCT among 843 experts working in 107 countries, asking about their expectations regarding GDP growth, unemployment, inflation, and trade in their country. The sample is split randomly in two subsamples. Half of the participants were surveyed closely before the election, the other half directly after Joe Biden had been called US president. Our results show that the election of Joe Biden increased growth expectations of international experts by 0.98 percentage points for the year 2021. We also find that (i) treatment effects materialize only in the short-run and (ii) experts’ uncertainty increased after the election. Our results suggest that exceptional politicians influence global economic outcomes.

Mission Starfish 2030: Restore our Ocean and Waters

What are EU Missions? Partly inspired by the Apollo 11 mission to put a man on the moon, EU missions are a commitment to solve major societal challenges like:

- Fighting cancer;
- Adapting to climate change;
- Living in greener cities;
- Ensuring soil health for healthy food, people, nature, and climate;
- Cleaning and restoring our ocean, seas, coasts and rivers.

Sustainable corporate governance

- Consultation -

Feedback period - 26 October 2020 - 08 February 2021 (midnight Brussels time)

As announced in the European Green Deal and the Commission's Communication on the (COVID-19) Recovery Plan, it is important that sustainability is further embedded into the corporate governance framework.

EU Action Plan Towards a Zero Pollution Ambition for air, water and soil

- Consultation -

Feedback period 11 November 2020 - 10 February 2021 (midnight Brussels time)

To secure clean air, water and soil, healthy ecosystems and a healthy living environment for Europeans, the EU needs to better prevent, remedy, monitor and report on pollution, mainstream the zero pollution ambition into all its policy developments and decouple economic growth from the increase of pollution, in line with United Nations driven efforts.

World Happiness Report 2020

The World Happiness Report is a landmark survey of the state of global happiness that ranks 156 countries by how happy their citizens perceive themselves to be. [The World Happiness Report 2020](#) for the first time ranks cities around the world by their subjective well-being and digs more deeply into how the social, urban and natural environments combine to affect our happiness

European Statistics (Eurostat)

Circular Economy - Overview

A circular economy aims to maintain the value of products, materials and resources for as long as possible by returning them into the product cycle at the end of their use, while minimising the generation of waste. The fewer products we discard, the less materials we extract, the better for our environment

Climate Change - Overview

Climate change refers to a **change in climate patterns** due to human activities, going beyond the natural variability in the climate. This is caused by **greenhouse gases** emitted into our atmosphere. Among the **drivers** of these emissions are the burning of fossil fuels, industrial processes, livestock farming, and waste treatment

Energy – Overview

Lighting, heating, transport, industry: energy is vital to run our essential day-to-day services and businesses. We take it for granted that we can switch on our computers and start our cars, yet these simple actions are the final stages of a complex process. For more information, watch our short video explaining how electricity is produced

Environment — Overview

Eurostat provides a range of statistics and accounts about the state of the environment and the drivers, pressures and impacts of our societies on the environment
