

## IPCC | Climate change widespread, rapid, and intensifying

GENEVA, Aug 9 – Scientists are observing changes in the Earth’s climate in every region and across the whole climate system, according to the latest Intergovernmental Panel on Climate Change (IPCC) Report, released today. Many of the changes observed in the climate are unprecedented in thousands, if not hundreds of thousands of years, and some of the changes already set in motion—such as continued sea level rise—are irreversible over hundreds to thousands of years.

The Working Group I report is the first instalment of the IPCC’s Sixth Assessment Report (AR6), which will be completed in 2022.

## ETTG | Climate, Conflict and Culture in EU’s diplomacy: Which way forward?

The June 2021 Council [Conclusions](#) on the EU approach to cultural heritage in conflicts and crises, the January 2021 Council [Conclusions](#) on Climate and Energy Diplomacy and the December 2020 Council [Conclusions](#) on EU Peace Mediation represent the ongoing evolution of the EU’s foreign policy thinking. Together, these documents present an interesting combination of “the three Cs” – Culture, Climate and Conflict – at the forefront of the EU’s diplomacy. The question however arises namely how much can the EU afford to prioritise such complex “value driven” policy agendas in a rapidly changing world with more competition and uncertainty?

Important links between climate change, security and culture have been long noted by experts. Climate change is recognized as a ‘threat multiplier’ putting multiple pressures on societies including those countries and regions where the potential for conflict is high, for example in Africa or in the Middle East. At the same time, culture plays a unique role in climate change adaptation and mitigation and also in conflict mitigation and crisis management. The cultural component adds an important human dimension to the more technical aspects of climate policies and the military and security aspects of conflict management.

## Global State of National Urban Policy 2021 | Achieving Sustainable Development Goals and Delivering Climate Action

The report assists national governments in advancing NUP processes, especially in improving links with Agenda 2030 for Sustainable Development and the New Urban Agenda, and mainstreaming climate action into NUP. The report is a collaborative project of the OECD, UN-Habitat and Cities Alliance, and an outcome of the National Urban Policy Programme, a global partnership launched in 2016 at the Habitat III Conference.

### Slovenian Digital Centre brings technology closer to people

The Slovenian Digital Centre is the main economic event of the Slovenian Presidency of the Council of the European Union, which will run until the end of the year, covering a variety of topics relevant to the continued sustainable and green development of Slovenia and the European Union.

The programme covers six, month-by-month topics related to digitalisation and the green transition. In July, the focus was on **smart cities and communities**, and in August, the centre of attention is on a **sustainable society and economy**. The September topic will be **artificial intelligence**, the October topic **5G and cybersecurity**, and the last two months of 2021 will be dedicated to **digital transformation** and **4.0 industry and robotics**.

### WorldBank | Going With The Flow: Water's Role in Global Migration

*Water has always influenced where we live. Today, as climate change accelerates the global water crisis, the relentless increase in the movement of people around the world requires a considered response to turn crisis into opportunity.*

**What makes us move** : There are more than 1 billion migrants in the world today – and water deficits are linked to 10% of the rise in global migration. The World Bank's just-released flagship publication on water shows that it is a lack of water, rather than too much, that has a greater impact on migration.

Ebb and Flow consists of two volumes. [Water, Migration, and Development](#) examines the link between water and migration, and the implications for economic development. It is based on analysis of the largest data set on internal migration ever assembled, covering nearly half a billion people in 64 countries from 1960 to 2015, and several national and global-level data sets that have been combined for the first time. Volume 2, [Water in the Shadow of Conflict](#), addresses the interplay of conflict with water and migration dynamics. in the Middle East and North Africa (MENA).

## Bruegel | How much investment do we need to reach net zero?

The size and scope of investments needed to reach net zero will have significant macroeconomic implications.

To become climate neutral by mid-century, the European Union and other major economies must substantially reduce their greenhouse gas (GHG) emissions during this decade. The EU aims to reduce its emissions by 55 percent by 2030 compared to 1990 levels with a wide range of policies recently proposed in the 'Fit for 55' package. Meanwhile, the United States (US) aims to reduce its emissions by 50-52 percent by 2030 compared to 2005 levels, and China wants its CO<sub>2</sub> emissions to peak before 2030. To achieve this, serious investments will be needed.

## OECD/G20 Base Erosion and Profit Shifting Project Addressing the tax challenges arising from the digitalisation of the economy

**Introduction** > As of 9 July, 132 countries and jurisdictions joined a new two-pillar plan to reform international taxation rules and ensure that multinational enterprises pay a fair share of tax wherever they operate. Over 130 countries, representing more than 90% of global GDP, joined the Statement establishing a new framework for international tax reform. A small group of the Inclusive Framework's 139 members have not yet joined the Statement at this time. The remaining elements of the framework, including the implementation plan, will be finalised in October 2021. The Statement is based on a two-pillar package.

Pillar One aims to ensure a fairer distribution of profits and taxing rights among countries with respect to the largest MNEs, which are the winners of globalisation.

Pillar Two seeks to put a floor on tax competition on corporate income tax through the introduction of a global minimum corporate tax that countries can use to protect their tax bases. Pillar Two does not eliminate tax competition, but it does set multilaterally agreed limitations on it.

## EconPol Annual Conference 2021 | The State of Fiscal Resilience – How Prepared is Europe for Future Crises? | 13 - 14 October

The European Union's recovery plan that has been adopted in response to the coronavirus crisis is a game changer in terms of European economic policy integration: NextGenerationEU is larger than any other stimulus package passed by the EU in previous crises. Together with the EU's long-term budget a total of EUR 1.8 trillion will be spent to boost and modernize Europe's economy with major priorities set in the areas of digitalization and climate change. The recovery package will also be financed by commonly issued debt.

## World Happiness Report 2021

The World Happiness Report 2021 focuses on the effects of COVID-19 and how people all over the world have fared. Our aim was two-fold, first to focus on the effects of COVID-19 on the structure and quality of people's lives, and second to describe and evaluate how governments all over the world have dealt with the pandemic. In particular, we try to explain why some countries have done so much better than others.

## Sustainable finance package

The European Commission adopted on 21 April 2021 an ambitious and comprehensive package of measures to help improve the flow of money towards sustainable activities across the European Union.

By enabling investors to re-orient investments towards more sustainable technologies and businesses, these measures will be instrumental in making Europe climate neutral by 2050.

They will make the EU a global leader in setting standards for sustainable finance. Press Release [aqui](#)

## [Un Environment | Sustainable Development Goals Progress Chart 2021](#)

The Sustainable Development Goals Progress Chart 2021 presents a snapshot of global and regional progress towards selected targets under the 17 Goals of the 2030 Agenda for Sustainable Development. The assessment is based on the most up-to-date data available. However, the full impact of the COVID-19 pandemic is not yet known. Moreover, since 2020, the pandemic has disrupted statistical operations worldwide, limiting the ability of many national statistical offices to deliver the data needed to monitor progress on the Sustainable Development Goals (SDGs).

## [ODSlocal - Plataforma Municipal dos Objetivos de Desenvolvimento Sustentável](#)

A Plataforma ODSlocal, assente numa mobilização abrangente e intensa de decisores e técnicos municipais, agentes locais e cidadãos em relação aos Objetivos de Desenvolvimento Sustentável (ODS) propostos pelas Nações Unidas na Agenda 2030, visa criar um movimento nacional ODSlocal a que os Municípios queiram aderir, mobilizando os restantes atores públicos e da sociedade civil de forma exponencial e contagiante.

## [The Demographic Landscape of EU Territories](#)

This report aims at detailing the territorial diversities of ageing across the EU, understanding the main drivers behind such differences and explore their relations with data on access to services and amenities, regional economic performance, political attitudes and behaviours.

## European Statistics (Eurostat)

### Circular Economy — Overview

A circular economy aims to maintain the value of products, materials and resources for as long as possible by returning them into the product cycle at the end of their use, while minimising the generation of waste. The fewer products we discard, the less materials we extract, the better for our environment.

### Climate Change — Overview

Climate change refers to a **change in climate patterns** due to human activities, going beyond the natural variability in the climate. This is caused by **greenhouse gases** emitted into our atmosphere. Among the **drivers** of these emissions are the burning of fossil fuels, industrial processes, livestock farming, and waste treatment.

### Energy — Overview

Lighting, heating, transport, industry: energy is vital to run our essential day-to-day services and businesses. We take it for granted that we can switch on our computers and start our cars, yet these simple actions are the final stages of a complex process. For more information, watch our short video explaining how electricity is produced.

### Environment — Overview

Eurostat provides a range of statistics and accounts about the state of the environment and the drivers, pressures and impacts of our societies on the environment.

### Coopstat News - newsletter da Cooperação Internacional do INE

Newsletter bilingue, com periodicidade semestral, dedicada às atividades de cooperação estatística do INE, a nível bilateral, com os Países Africanos de Língua Oficial Portuguesa (PALOP), com a Comunidade dos Países de Língua Portuguesa (CPLP) e com outros países terceiros e, a nível multilateral, no âmbito do Sistema Estatístico Europeu, ONU e OCDE.

[Dados estatísticos oficiais mais recentes em Portugal para acompanhamento do impacto social e económico da Pandemia.](#)

### Contas Nacionais Trimestrais

Produto Interno Bruto em volume registou uma variação de 15,5% em termos homólogos e de 4,9% em cadeia - 2.º Trimestre de 2021 (divulgado a 31 de Agosto de 2021).

Divisão de Estratégia, Planeamento e Estatística (DEPE) | Secretaria-Geral

### Contas do Setor de Bens e Serviços Ambientais

Em 2018 o setor de bens e serviços ambientais gerou 2,6% do VAB nacional. A despesa nacional em proteção do ambiente aumentou 7,9% - 2018 (divulgado a 25 de Março de 2021).

### Conta das Emissões Atmosféricas

O Potencial de Aquecimento Global diminuiu 4,5% em 2018, apesar do crescimento da atividade económica – 2018. (divulgado a 14 de Outubro de 2020).

### Objetivos de Desenvolvimento Sustentável

A resolução A/RES/70/1 [Transformar o nosso mundo: Agenda 2030 de Desenvolvimento Sustentável \(apenas em inglês\)](#) foi aprovada na Cimeira das Nações Unidas (NU) sobre Desenvolvimento Sustentável realizada em Nova Iorque, em 26-27 de setembro de 2015. Trata-se de um plano de ação para as pessoas, para o planeta e para a prosperidade e estabelece um conjunto de 17 objetivos – os Objetivos de Desenvolvimento Sustentável (ODS) - e de 169 metas a ser alcançados, por todos os países, até 2030. Para monitorizar o progresso dos ODS, a 47ª sessão da Comissão de Estatística das NU (UNSC) acordou, em 2016, um conjunto de 241 indicadores, aos quais a 48ª UNSC fez alguns ajustamentos, em março de 2017. Neste dossiê temático (ainda em desenvolvimento) é divulgada a informação já disponível para alguns desses indicadores, podendo alguns ser provisórios e *proxies*.

[Publicação e tabelas: ODS - Indicadores para Portugal - Junho 2021](#) | [Publicação infográfica](#)

### Paridades de Poder de Compra

O Produto Interno Bruto per capita, expresso em Paridades de Poder de Compra, situou-se em 79,2% da média da União Europeia – 2019 (divulgado a 15 de Dezembro de 2020).

### Estatísticas do Ambiente

A publicação Estatísticas do Ambiente, na sua edição de 2020, segue a linha editorial e a estrutura do ano anterior e apresenta uma análise detalhada do setor do ambiente privilegiando-se a divulgação da informação através de quadros de indicadores síntese, figuras e mapas.

### Consumo de Materiais

A Conta de Fluxos de Materiais pretende retratar, no âmbito do ambiente natural, a relação da economia nacional com o resto do mundo, constituindo uma fonte de informação importante na monitorização da economia circular.
